How to Improve Google Rankings

Having a strong presence on the internet is important for ensuring current and potential customers alike find your website and auctions. If you don't have a strong website that is properly optimized, it will not appear in Google's Search Results. One of the most likely reasons that your website is not appearing in search results is that it is not crawlable, and therefore cannot be indexed. To fix this issue, it is important to understand how Google crawls and indexes your website to determine rankings on search engine results pages.
